

Managed-AIS (Formerly Mekon-AIS)

Managed-AIS are an Aeronautical Information Software and Services company offering world class publishing and data management solutions. We provide a range of Off-the-Shelf products that are tried, tested and in use in over 30 States and organisations around the world. Although best known for the world-leading AIP and eAIP software FrameAPS/APSxml, we also offer a full supporting suite of AIXM Data Management and Aeronautical Data Exchange Products.

Our training programmes ensure that clients get the best out of their software while our full range of maintenance and support packages helps keep systems up to date and users proficient. Training is available for all our products and in the past 7 years we have provided training to over 250 AIS professionals from all over the world. Clients can take advantage of our AIS expertise through a range of services including Document Conversion, Data Migration and Consultancy.

M-AIS Aeronautical Information Management

At Managed-AIS we have a long history of serving the aviation market and we continue to do so through a growing number of active contracts with aviation organisations, States and partner companies.

M-AIS are the number one provider in Europe and around the world for AIP/eAIP solutions with recent clients including the UK, Finland, Algeria and our largest contract to date with NavCanada. We provide the approved AIP and eAIP subsystem software for the European AIS Database (EAD) project and our customer base in this arena continues to grow with over 20 customers currently using or migrating to our APS platform.

At Managed-AIS, through our training and services, we strive to develop close working partnerships with our clients to ensure that they get all the support and expertise they require. Our products are fully compliant with the ICAO's Annex 15 and Document 8126 standards and the EUROCONTROL eAIP specifications. Quality is central to every aspect of our business.

M-AIS Consultancy and Services:

At Managed AIS we have found that it is never enough to simply sell software to a client and then offer no additional services. The success of the client in implementing the software also depends heavily on making sure that the specialist information required to make the software run is available at the time of going live. To this end Managed AIS offer the following Services to complement our software products:

- eAIP Document Conversion
- AIP Document Conversion
- Custom Document Conversion
- AIXM Database Population
- Survey to AIXM Data Mappings
- AIXM Data conversion

M-AIS Training:

Training is essential for a successful transition to any new technology and at Managed AIS we provide our clients with the training required to become more productive using their new Publishing and Database software. Our publishing specialists share their own expert knowledge and experience to ensure that each course achieves positive results.

- APSxml Structured eAIP Courses
- FrameAPS Unstructured AIP Courses
- FrameMaker Professional Training
- AIXM Data Validation Training
- Data conversion training
- AIS Automation Training

M-AIS Software Solutions:

M-AIS offer a range of effective Aeronautical Publishing and AIXM Data solutions. We provide a suite of modular software to meet the growing requirements for safe, integrated aeronautical information management and distribution.

- eAIP Solution – apsXML
- AIP Solution – FrameAPS
- AIS Data Mapping – ADEP
- AIXM Database
- AIXM Data Management System
- Custom Development

M-AIS Support :

Here at Managed-AIS our customer relationships are vital to everything we do. In order to ensure that client's expectations are met with regards to support and product maintenance we employ a full support team to manage and track customer enquiries. Issues are closed only when the client is satisfied that the problem has been resolved.

All products are backed up with full Warranty, Maintenance and Support contracts available over periods of 1 to 5 years.
